SUMMARY

High-achieving Information Technology & Management student at Illinois Institute of Technology, skilled in JavaScript, React.js, Python, and full-stack web development. Proven strong collaborator and technical leader with STEM teaching experience and academic recognition on the Dean's List.

EDUCATION

Illinois Institute of Technology, Chicago, IL
Bachelor of Information Technology & Management

Expected May 2026

SKILLS

Languages & Tools: JavaScript, React.js, Python, Java, SQL, HTML, CSS, Git, GitHub, REST APIs, Tkinter, JSON, Node.js.

Development & Design: Front-End UI/UX, Responsive Web Design, Debugging, Version Control, MVC Patterns.

Professional Skills: Project Management, Technical Support, Leadership, and Stakeholder Collaboration.

WORK EXPERIENCE

STEM Teaching Assistant

Ableway International Christian Schools, Abia State, Nigeria

July 2019 – August 2021

- Strengthened academic performance for 40+ secondary-level students by delivering over 90 hours per semester of tutoring in math and science.
- Structured lesson plans and supervised lab activities to improve readiness for the West African Senior School Certificate Examination, contributing to measurable increases in student pass rates.
- Coordinated small-group learning sessions and academic mentorship, building confidence and improving analytical problem-solving competency.

PROJECT EXPERIENCE

FoodSaver AI — *React, JavaScript, AI APIs, Node.js, CSS, GitHub*

September 2025

- Identified inefficiencies in food usage and waste; engineered an AI-powered recipe generator that scans ingredients and recommends optimized meal options.
- Integrated API-driven ML recommendation engine generating over 1,000 personalized suggestions, enhancing ingredient utilization, and reducing decision time for users.
- Optimized UI responsiveness and asynchronous data handling, improving interaction efficiency and reducing average scan workflow time to under 2 minutes.

CheckURL Browser Extension — *JavaScript, HTML/CSS, Manifest V3, APIs*

November 2025

- Designed and built a browser extension that automatically scans URLs and identifies malicious or suspicious domains without requiring manual copy-paste.
- Implemented API-based threat detection and dynamic content scripts, improving user safety and reducing the risk of phishing exposure for non-technical users.

INVOLVEMENT & RECOGNITION

Tech Volunteer – Real-Time Communications Conference & Expo, Illinois Tech

October 2021

- Delivered real-time event technology support, including audiovisual setup, device troubleshooting, and live session support for 50+ conference participants and presenters.

Dean's List, Illinois Institute of Technology
